

2nd EUROPEAN LAM CONFERENCE

BARCELONA, SEPTEMBER 28-29TH 2012

OBJECTIVES OF THE MEETING

The Second European LAM Conference is an international meeting with the purpose of getting insights into the new results of research and sharing with patient's community and educational objectives. Working together for increasing knowledge and resources for this rare disease.

Our proposal is a new challenge for patients and the professional community: the conference seeks scientific excellence from a comprehensive view focused on patient's interests in combination with educational goals not only for clinical practice but also for daily patient's life. This Second LAM Conference is integrated with the Rare Respiratory Disease Year's activities program by The Spanish Society of Pulmonology and Thoracic Surgery.

ORGANIZED BY:

AELAM (Spanish LAM Association) and SEPAR.
