|---|---|---|
| Networking Session | Comfort break | Closing Plenary Session |

---

Diagnosis · Healthcare ecosystem · Reducing inequalities · Research & development · Optimal use of data · Availability, accessibility and affordability

# LEARNING PATHWAYS

**Diagnosis:** improving access to effective diagnostic tools for rare diseases and accelerating diagnosis through the optimised sharing of data.

Found in both sessions of Tracks A, B and E

Thought leader session. RD Partnership

**A highly specialised healthcare ecosystem**, with political, financial and technical support at European and national levels, that leaves no person living with a rare disease in uncertainty regarding their diagnosis, care or treatment.

Found in both sessions of Tracks A, B and E

**Reducing inequalities** through the identification and removal of systemic barriers through targeted policy interventions to ensure people living with a rare disease are given the same opportunities as others to reach their maximum level of health and well-being.

Found in both sessions of Tracks C and D

**Rare disease research and development of orphan medicinal products maintained as a priority** - across basic, clinical, translational and social research.

Found in both sessions of Track F

Thought leader session. RD Partnerships. Opening plenary session

**Data used optimally** to improve the health and well-being of people living with a rare disease.

Found in Session 1 of Track C/D and both sessions of Track E

**Improve the availability, accessibility and affordability of rare disease treatments, by attracting investments**, fostering innovation and collaboration across countries, to address inequalities.

Found in both sessions of Tracks A, B and F
